

CBQ Name Badge - postcard style

Trace the shapes to the left onto lightweight fusible. (I use Heat n Bond Lite)

Cut them apart, leaving extra around each piece.

Fuse them to the back side of the fabrics of your choice. #4 needs to be on a solid light colored fabric, because you will be adding your name in this space.

Carefully cut out each piece on the line.

Peel the paper off the back of each piece and arrange them right sides up to look like the heart in the corner.

Place these pieces on the square of heavy weight interfacing. Line them up as carefully as you can, edges should meet but not overlap.

Fuse into place by pressing with a hot dry iron.

Top stitch raw edges (except around outer edge) using a zigzag stitch and thread color of your choice. Use white thread in bobbin.

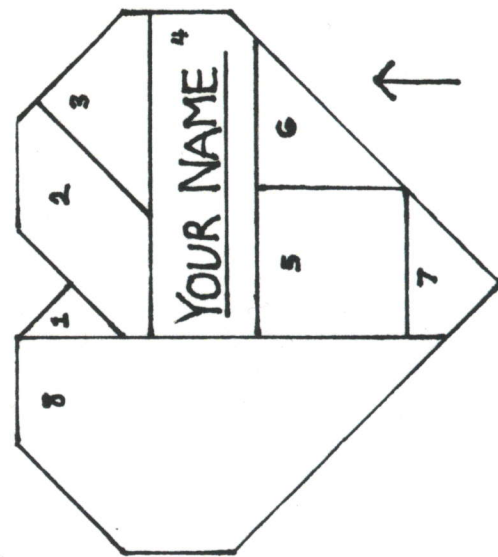

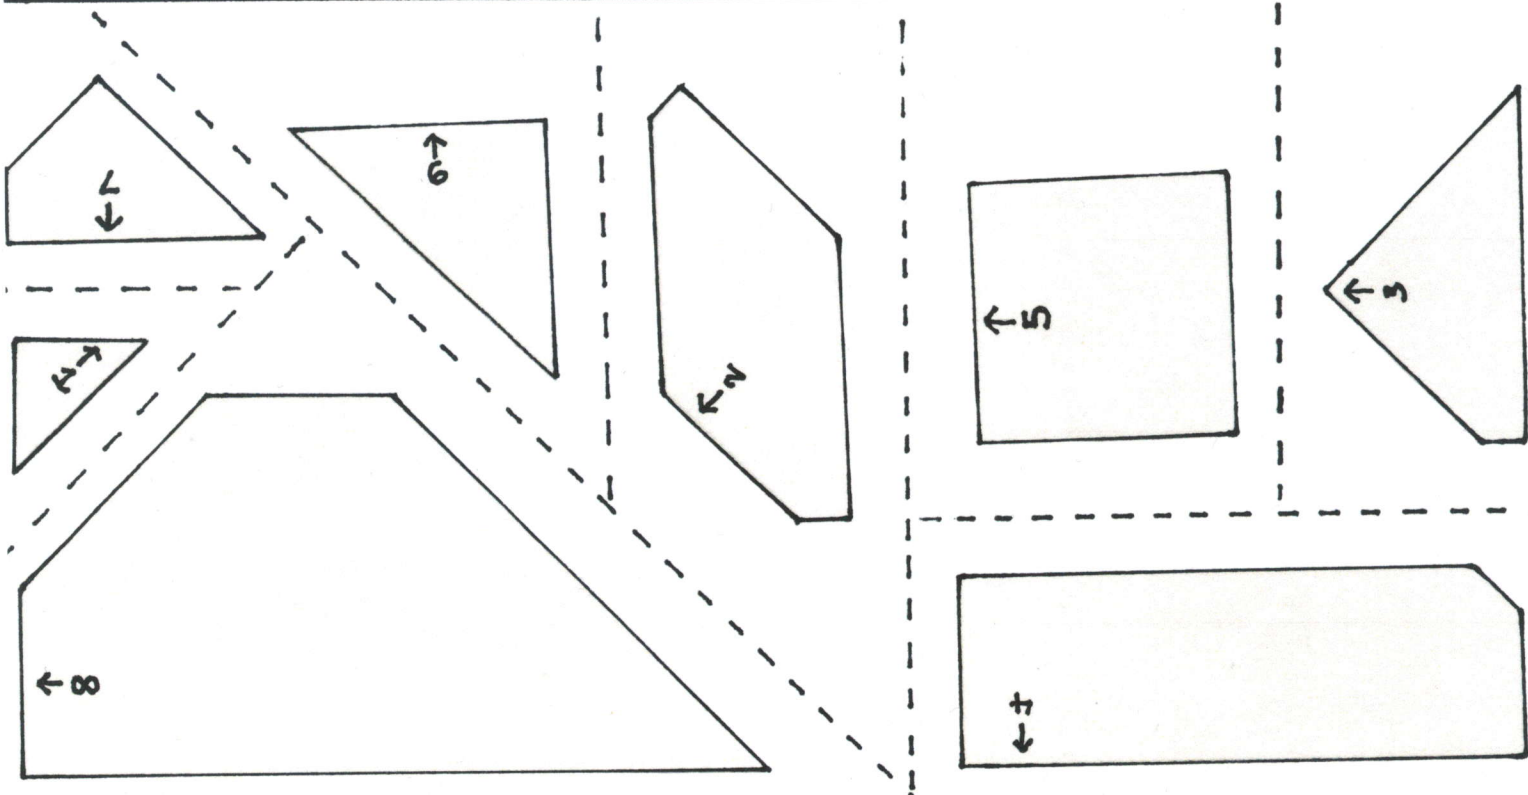

Carefully cut out heart shape.

Fuse backing onto heart shape.

Zigzag stitch around outer edge.

Write your name on piece #4

Add pin to back and enjoy!
